# MLT-2940: MEDICAL LABORATORY FIELD EXPERIENCE

# **Cuyahoga Community College**

Viewing: MLT-2940: Medical Laboratory Field Experience

**Board of Trustees:** 

1/30/2025

**Academic Term:** 

Fall 2025

**Subject Code** 

MLT - Medical Laboratory Technology

**Course Number:** 

2940

Title:

Medical Laboratory Field Experience

#### **Catalog Description:**

Capstone course in Medical Laboratory Technology. Supervised clinical experience. Students rotate through chemistry, microbiology, serology, immunohematology, hematology/coagulation, urinalysis, and phlebotomy departments for a minimum of 315 hours meeting performance objectives of medical laboratory personnel at the MLT level

#### Credit Hour(s):

3

#### Other Hour(s):

40

### Other Hour Details:

Field Experience: 40 hours per week

## Requisites

#### **Prerequisite and Corequisite**

MLT-2991 Advanced MLT Applications; and concurrent enrollment in MLT-2980 Professional Development and Life Skills

#### Outcomes

# Course Outcome(s):

Perform as an entry-level Medical Laboratory Technician (MLT) through practical application of theoretical knowledge and basic skills acquired in a clinical setting in the following clinical laboratory departments: phlebotomy, serology, immunohematology, hematology/coagulation, body fluids, chemistry, or microbiology.

#### Objective(s):

- 1. Examine the flow of work in the laboratory and describe the interrelationships of divisions of the clinical laboratory relative to performance of diagnostic tests.
- 2. Apply appropriate troubleshooting techniques when necessary
- 3. Evaluate and validate test results.
- 4. Log in and process specimens and keep accurate records.
- 5. Prepare and transmit reports, electronically, verbally or in writing.
- 6. Properly triage stat specimens and report all critical values properly.
- 7. Develop the ability to plan, organize and efficiently handle workload.
- 8. Develop speed and accuracy in performance of diagnostic tests commonly performed by the MLT.
- 9. Work independently or as a team member as needed in an effective manner.
- 10. Maintain an organized, neat and clean workstation.
- 11. Assume responsibility for his/her own work
- 12. Set up and perform routine manual procedures including blood collection, with minimal assistance, obtaining results within established ranges.

- 2
- 13. Develop ethical and professional behaviors in the clinical setting.
- 14. Demonstrate effective communication skills, both written and verbal.
- 15. Operate sophisticated medical laboratory instrumentation correctly.
- 16. Perform simple maintenance of instruments.
- 17. Recall the principles of methodologies for tests.
- 18. Recognize factors which directly affect procedures and results.
- 19. Identify, explain, and apply quality control procedures in each of the departments.
- 20. Use and monitor quality control programs with predetermined parameters.
- 21. Recognize and avoid objective, subjective, and technical errors in diagnostic procedures.

#### Methods of Evaluation:

- 1. Examinations
- 2. Laboratory practical examinations
- 3. Instructor evaluation of bench performance
- 4. Competency check list

#### **Course Content Outline:**

- 1. Workflow in laboratory
- 2. Specimen collection, handling, processing, and storage
- 3. Laboratory computer systems, accessioning/result entry
- 4. Performance of routine manual laboratory tests
- 5. Performance of automated tests using laboratory instrumentation
  - a. Maintenance of instruments
  - b. Operation
  - c. Troubleshooting
- 6. Quality control in all departments, for both manual and automated tests
- 7. Recognizing out of control situations
- 8. Factors affecting tests
- 9. Principles and methodologies of all tests and instruments
- 10. Perform at entry-level
  - a. Organizational skills
  - b. Speed
  - c. Accuracy
- 11. Reporting of results
- 12. Professional actions and demeanor
- 13. Communication skills
