

# NURS-2011: CONCEPTS OF NURSING CARE FOR PATIENTS WITH COMPLEX CONDITIONS

---

## Cuyahoga Community College

**Viewing: NURS-2011 : Concepts of Nursing Care for Patients with Complex Conditions**

**Board of Trustees:**

March 2024

**Academic Term:**

Fall 2025

**Subject Code**

NURS - Nursing

**Course Number:**

2011

**Title:**

Concepts of Nursing Care for Patients with Complex Conditions

**Catalog Description:**

This course builds on previous courses to further refine and apply the concepts of nursing practice in the care of patients with complex conditions. Includes concept analysis and related exemplars necessary to provide care to patients with various selected complex conditions. Application of knowledge and skills occurs in the nursing laboratories, a variety of clinical settings, and includes the capstone experience.

**Credit Hour(s):**

5

**Lecture Hour(s):**

2

**Lab Hour(s):**

.43

**Other Hour(s):**

8.57

**Other Hour Details:**

On Campus Laboratory: 6.5 hours per semester; Clinical Laboratory: 128.5 hours per semester

## Requisites

**Prerequisite and Corequisite**

NURS-2000 Concepts of Nursing Care for Patients with Acute Unstable and Chronic Conditions II, and departmental approval.

## Outcomes

**Course Outcome(s):**

Integrate safe, quality, evidence-based, patient-centered nursing care in a variety of healthcare settings to diverse patients with complex conditions.

**Essential Learning Outcome Mapping:**

Critical/Creative Thinking: Analyze, evaluate, and synthesize information in order to consider problems/ideas and transform them in innovative or imaginative ways.

Oral Communication: Demonstrate effective verbal and nonverbal communication for an intended audience that is clear, organized, and delivered effectively following the standard conventions of that language.

Written Communication: Demonstrate effective written communication for an intended audience that follows genre/disciplinary conventions that reflect clarity, organization, and editing skills.

Quantitative Reasoning: Analyze problems, including real-world scenarios, through the application of mathematical and numerical concepts and skills, including the interpretation of data, tables, charts, or graphs.

**Objective(s):**

1. Conduct a head-to-toe and/or focused physical, behavioral, psychological, and spiritual assessment of health and illness parameters in patients, using developmentally and culturally appropriate approaches.
2. Manage patient needs based on assessment findings of patients with complex conditions.
3. Evaluate a plan of care based on evidence-based practice considering individual patient needs for patients with complex conditions.
4. Integrate patient-centered care that reflects an understanding of human growth and development, pathophysiology, pharmacology, nutrition, medical management, and nursing management throughout the lifespan for patients with complex conditions.
5. Evaluate factors that create a culture of safety.
6. Construct, implement, and evaluate patient teaching plan that reflects developmental stage, age, culture, spirituality, patient preferences, and health literacy considerations.
7. Evaluate patient outcomes to determine the effectiveness and impact of nursing care.
8. Deliver care within expected timeframe for patients with complex conditions.
9. Utilize effective communication techniques when transitioning care to another interprofessional health care team member.
10. Provide cultural awareness and sensitivity concepts when providing care to diverse patients with complex conditions.
11. Revise the plan of care based on an ongoing evaluation of patient outcomes including recognition of alterations to previous patient conditions.
12. Demonstrate safe performance of psychomotor skills for efficient, safe, and compassionate patient care.
13. Document all aspects of patient care for patients with complex conditions.

---

**Course Outcome(s):**

Integrate clinical judgment to make increasingly complex patient-centered care decisions for patients with complex conditions.

**Essential Learning Outcome Mapping:**

Critical/Creative Thinking: Analyze, evaluate, and synthesize information in order to consider problems/ideas and transform them in innovative or imaginative ways.

**Objective(s):**

1. Use clinical judgment to make management decisions to ensure accurate and safe nursing care, including addressing anticipated changes in the patient's condition for patients with complex conditions.
2. Use clinical judgment when implementing all steps of the nursing process while integrating best available evidence in the care of patients with complex conditions.
3. Anticipate common risks for patients with acute and chronic conditions, and predict and manage potential complications for patients with complex conditions.
4. Manage and prioritize patient care for patients with complex conditions.
5. Assess the clinical microsystem and its impact on the nurse's ability to provide safe, quality care for patients with complex conditions.

---

**Course Outcome(s):**

Develop a quality improvement process to improve patient care for patients with complex conditions.

**Essential Learning Outcome Mapping:**

Critical/Creative Thinking: Analyze, evaluate, and synthesize information in order to consider problems/ideas and transform them in innovative or imaginative ways.

**Objective(s):**

1. Recommend quality improvement processes to effectively implement patient safety initiatives and monitor performance measures, including nursing-sensitive indicators in the microsystem of care for patients with complex conditions.
  2. Recommend quality improvement projects for patients with complex conditions.
  3. Recommend interventions to decrease gaps between local and national standards of practices and competencies for patients with complex conditions.
  4. Participate in analyzing errors and identifying system improvements for patients with complex conditions.
  5. Implement National Patient Safety Goals for patients with complex conditions.
-

**Course Outcome(s):**

Participate in collaboration and teamwork with members of the interprofessional team, the patient, and the patient's support systems for patients with complex conditions.

**Essential Learning Outcome Mapping:**

Oral Communication: Demonstrate effective verbal and nonverbal communication for an intended audience that is clear, organized, and delivered effectively following the standard conventions of that language.

**Objective(s):**

1. Collaborate with all members of the healthcare team, including the patient and the patient's support network when making decisions and planning care.
2. Collaborate with the appropriate interprofessional healthcare professional to communicate data collected during patient care.
3. Evaluate patient safety and quality improvement concepts within the context of the interprofessional team for patients with complex conditions.
4. Implement conflict resolution principles as needed for patients with complex conditions.

**Course Outcome(s):**

Manage information management principles, techniques, and systems, and patient care technology to communicate, manage knowledge, mitigate error, and support decision-making for patients with complex conditions.

**Objective(s):**

1. Differentiate patient care technologies, information systems/technologies, and communication devices to support safe nursing practice for patients with complex conditions.
2. Evaluate the role of information technology and information systems in improving patient care outcomes and creating a safe care environment for patients with complex conditions.
3. Select patient care technologies as appropriate to address the needs of patients with complex conditions.

**Course Outcome(s):**

Assimilate leadership, management, legal, and ethical guidelines in practice as a professional nurse.

**Objective(s):**

1. Provide nursing care within the legal and ethical frameworks of nursing practice.
2. Analyze planned patient care within the context of the American Nurses Association (ANA), Quality, Safety, Education for Nurses (QSEN), and National League for Nursing (NLN) Standards of Practice for patients with complex conditions.
3. Demonstrate accountability for nursing care given by self and/or delegated to others as applied to the care of patients with for patients with complex conditions.
4. Integrate management skills and knowledge of the rules and principles of delegation when working with other healthcare team members.
5. Serve as a patient advocate for patients with complex conditions.
6. Evaluate the impact of economic, political, social, and demographic forces on the delivery of health care.
7. Design a plan for ongoing professional development and lifelong learning.

**Methods of Evaluation:**

1. Case Studies
2. Clinical Evaluation Tool
3. Exams
4. Quizzes
5. Resume, Cover letter
6. Situation, Background, Assessment, Recommendation (SBAR) written reports
7. Teaching Plan

**Course Content Outline:**

1. Clinical Judgment\*
  - a. Prioritization of patient care in emergent/urgent situations
    - i. Advanced Cardiac dysrhythmias (ACLS)
    - ii. Closed head injury
    - iii. Burns
    - iv. Spinal cord injury
  - b. Disaster preparedness
  - c. Early recognition/early treatment of Intensive care psychosis
  - d. Nursing process
2. Gas Exchange
  - a. Acute respiratory Distress Syndrome (ARDS)
  - b. Arterial blood gas (ABG)
  - c. Mechanical ventilation
3. Communication\*
  - a. SBAR
  - b. Therapeutic Communication
  - c. Nurse-patient
  - d. Nurse interdisciplinary team
4. Professional identity\*
  - a. Delegation
  - b. Scope of practice
  - c. Management
5. Safety\*
  - a. Ohio Board of Nursing (OBN)
  - b. American Nurses Association (ANA)
  - c. National Patient Safety Goals
  - d. Quality, Safety, Education for Nurses (QSEN)
  - e. Occupational Safety and Health Administration (OSHA)
  - f. Care coordination
  - g. Error reporting and analysis
  - h. Recognition of/action on adverse effects
  - i. Medication administration
6. Collaboration\*
  - a. Conflict resolution
  - b. Interprofessional collaboration
  - c. Nurse-to-Nurse collaboration
  - d. Civility
  - e. Nurse-patient-family
7. Culture and Diversity\*
  - a. Cultural Practices
  - b. Healthcare Disparities
8. Technology and Informatics\*
  - a. Patient triage tools
  - b. Electronic Health Records (EHR)

\*These concepts and exemplars are taught across the curriculum.
